

Vive Foliar Portfolio

Get Enhanced Foliar Protection With Vive's Easy-To-Use Fungicides and Insecticides

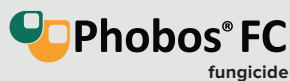

For growers looking to improve standability, maximize vigor, and maintain greener plants, AZterknot® provides excellent control of major foliar diseases while boosting plant performance under stressful conditions to increase crop quality and yield potential.

Contains Azoxystrobin + *Reynoutria sachalinensis* extract ● Groups 11 + P5 ● Unique to Market

AZteroid® FC^{3.3} delivers long-lasting disease control and maximizes farming efficiency through best-in-class fertilizer compatibility.

Contains Azoxystrobin ● Group 11 ● Compare to Abound®

Phobos® FC, a ground-breaking prothioconazole fungicide, provides superior broad-spectrum protection against a wide range of diseases while maximizing crop performance, quality, and yield.

Prothioconazole ● Group 3 ● Compare to Proline®

Averland® FC effectively suppresses mites, Colorado potato beetle, and many other pests during critical in-season stages, in an easy-to-use liquid solution.

Contains Abamectin ● Group 6 ● Compare to Agri-Mek® SC

A superior foliar control solution for pests like Navel orange worm, Plant bugs, Stink bugs, and other secondary pests, Bifender® FC delivers greater convenience, flexibility, and compatibility with a best-in-class user experience and a positive ROI.

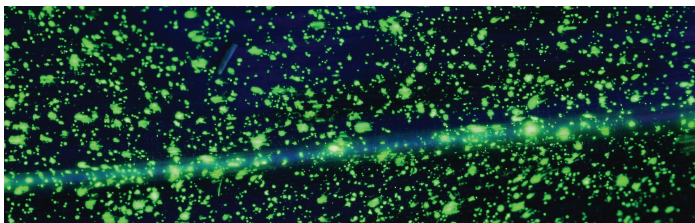

Contains Bifenthrin ● Group 3 ● Compare to Brigade® 2EC and Capture® LFR®

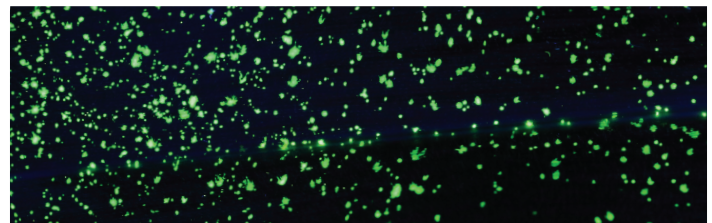

For great control of pest like Plant bugs, Fleahopper, Aphids, Psyllids and Whiteflies, look to Viloprid 4. The easiest to handle imidacloprid solution, Viloprid® 4 stays in suspension longer and is compatible with foliar feeds and other crop inputs compared to Admire® Pro and other leading imidacloprid brands.

Contains Imidacloprid ● Group 4A ● Compare to Admire® Pro

Superior Foliar Spray Coverage

AZterknot®

Quadris®

Powered by Precision Chemistry™, AZterknot® provides superior foliar leaf coverage. On a corn leaf, AZterknot® droplets stick better than Quadris®, improving droplet retention and maximizing the surface area protected.
