

Averland[®] FC

nematicide

An Easy Way to Protect your Corn Roots from Nematode Damage

THE AVERLAND[®] FC DIFFERENCE

- When applied in-furrow, it maximizes yield potential by providing a concentrated area of protection around the seed and root zone through critical early stages of crop development.
- Easy to handle, low use rate, liquid nematicide with an excellent safety profile.
- Compatible with liquid fertilizers, micronutrients, and other inputs for ease-of-use.
- The only liquid abamectin product labeled in-furrow on corn.
- Pair with Bifender[®] FC insecticide for corn rootworm control or AZteroid[®] FC 3.3 fungicide for added plant health and disease protection.

CATEGORY	Nematicide
CONTAINS	Abamectin (0.7 lbs/gal) + Allosperse
GROUP	6
APPLICATION	Soil
PACKAGE SIZE	4 x 1 gal 2 x 2.5 gal

PRECISION CHEMISTRY™ FOR REAL RESULTS

Vive's Precision Chemistry™ solutions contain Allosperse[®] Delivery Technology, a patented nano-polymer that influences how proven active ingredients behave in the jug and the field to simplify crop production and deliver real results to growers.

ACTIVE
INGREDIENT

NANO-POLYMER

ALLOSPERSE[®]
DELIVERY TECHNOLOGY

Allosperse targets and optimizes the interaction between active ingredients, liquid fertilizers, micronutrients, and other crop inputs creating a hassle-free, more efficient application to ensure performance is at its very best.

HERE'S WHAT CUSTOMERS ARE SAYING

"I have been getting calls from other retailers and growers asking me what we did different on these fields this year ... the visual difference was very obvious in the fields that had Averland FC."

Ag Retailer - Wray, Colorado

A SAFER SOLUTION

Toxicity Chart

Product	Rat Acute Oral LD50	Toxicity Relative to Averland® FC
Averland® FC	165 mg/kg	-
Counter®	17.8 mg/kg (male)	>9x's more toxic

Averland FC is an easy to handle, low use-rate liquid nematicide that boasts an excellent worker safety profile.

EXCELLENT ACTIVITY ON CORN NEMATODES

Untreated

Averland® FC

Protection from early nematode feeding is crucial to get your corn plants off to a strong start. Corn treated with Averland FC have larger, healthier root systems that help the plant take up water and nutrients more efficiently, leading to better yielding corn.

INCREASES IN YIELD

Corn Trial Yield Averages

In 6 trials with moderate to high nematode pressure, corn treated with Averland FC had an average yield increase of **13 bu/ac vs untreated**. Based on product input cost per acre and current corn prices, Averland FC delivered a very positive ROI.

2021-2022. NE, NC, GA (n=6)

SUPERIOR NEMATODE SUPPRESSION

Corn Trial Summary / Yield Impact

In corn, Averland FC is an effective nematicide that suppresses nematodes during critical early stages across a wide range of conditions (weather, soil type, fertilizer type) with **improved yield protection compared to Velum (GA trials)**.

2021. Site: A. NE, NC, GA, LA (n=5). B. GA (n=3).

AVERLAND® FC RATES

	AI (lb/gallon)	Application Rate (fluid oz/ac)
Corn (in-furrow)	0.7	4.0 to 6.0
