HERE'S WHAT CUSTOMERS ARE SAYING

"You're talking about a \$10/A application that's getting pretty good results on root-knot nematodes. You're definitely getting a benefit of the savings and good activity."

Chris Martin, Grower - Hawkinsville, GA

"Trouble free. I mean it's just smooth. Goes right in there. It's compatible and it flows. We didn't have any issues in the mixing or application process."

Jeffery Lee, Grower - Benson, NC

PROTECT ROOTS FROM NEMATODE DAMAGE

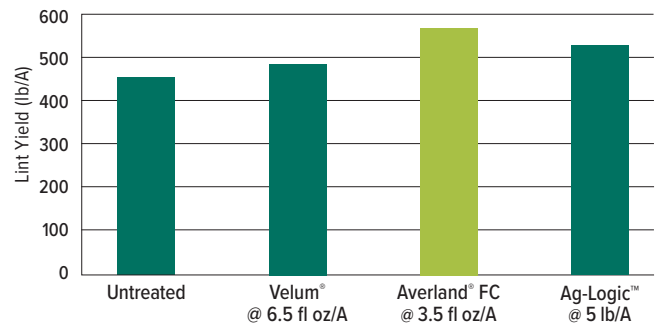

An invisible menace, nematodes are on the rise, destroying cotton root systems and ultimately decreasing yield potential. Growers have found that using Averland® FC at-plant helps to protect the seed and growing root system from yield-robbing nematodes.

2023. Hawkinsville, GA

AVERLAND® FC INCREASES COTTON YIELDS

Cotton Lint Yield Trials

Applied in-furrow, Averland® FC preserved vigour and protected cotton stands against southern root-knot nematode ensuring maximum yield potential and ROI.

2022. Lubbock, TX

AVERLAND® FC IN-FURROW RATES

	AI (lb/gal)	Application Rate (fl oz/A)
Cotton	0.7	3.5
Corn	0.7	4.0 to 6.0
