

Midac[®] FC

insecticide

The Only Fertilizer-Compatible Imidacloprid Product for Sugarbeet Root Maggot Control

THE MIDAC[™] FC DIFFERENCE

- Outstanding systemic control of above-ground pests and Sugarbeet root maggot.
- Saves time, labor and fuel because it can be mixed and applied in the same tank with liquid fertilizers, micronutrients, hard water and other chemicals.
- Trusted, long-lasting systemic performance.
- No heavy boxes or extra equipment needed.

Get trusted performance and hassle-free insect control with Midac[®] FC.

PACKAGE SIZE	2 x 2.5 gal

KEY INSECTS CONTROLLED

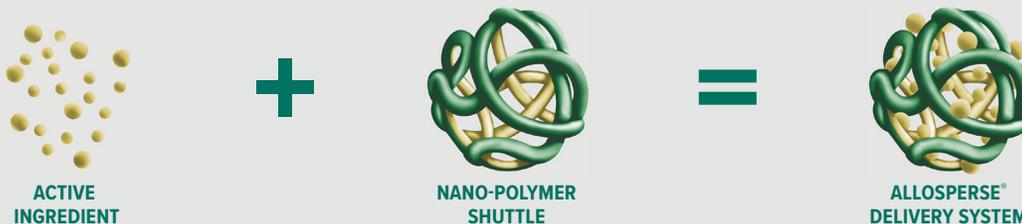

- Sugarbeet root maggot
- Aphids
- Beet curly top virus¹
- Flea beetle
- Leafhoppers
- Western yellows¹
- Whiteflies

¹ Suppression of symptoms

PRECISION CHEMISTRY FOR REAL RESULTS

Vive products contain the Allosperse[®] Delivery System, a unique proprietary technology that changes how proven active ingredients behave in the spray tank.

Using patented nano-polymer shuttles, Allosperse carries the active ingredient where it needs to go.

Allosperse targets and optimizes the interaction between active ingredients, fertilizers, micronutrients, biologicals, and other chemicals to ensure product compatibility and performance is at its very best.

HERE'S WHAT CUSTOMERS ARE SAYING

"We did try a little bit of Midac. It went into solution very well. We didn't notice any problems at all.

If it sits overnight, you don't see where it settled out or anything like that.

If you are going to put fertilizer in your system I definitely think it is something you want to take a look at."

Paul Knoerr
Michigan sugarbeet grower

SIGNIFICANTLY DECREASES IMPACT OF SUGARBEET ROOT MAGGOT

Midac[®] FC Treated **Untreated**

An in-furrow application of Midac FC and starter fertilizer significantly decreases the impact of sugarbeet root maggot and other pests.

SEAMLESS COMPATIBILITY AND MIXING FOR IMPROVED EFFICIENCY

Midac FC + 10-34-0

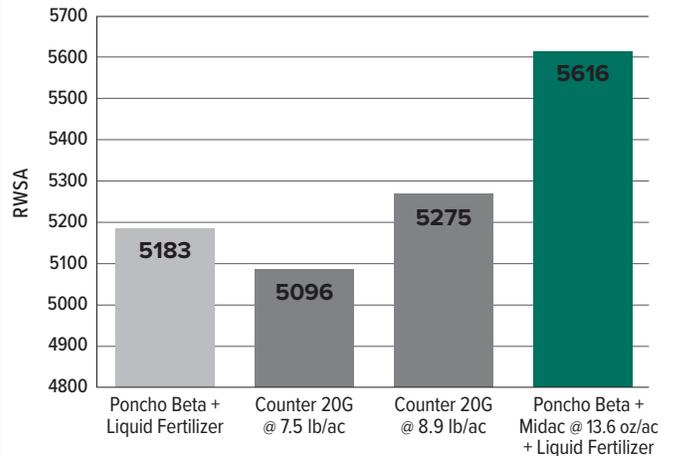

Competitor 4 lb imidacloprid + 10-34-0

The only fertilizer-compatible imidacloprid, Midac FC mixes seamlessly with liquid fertilizers, micronutrients and other crop inputs for an easy and efficient in-furrow planting operation.

INCREASES YIELD & ROI

Sugarbeet Trial / RWSA
