PRECISION CHEMISTRY™ FOR REAL RESULTS

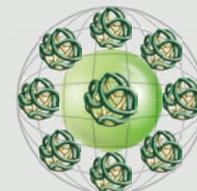

Vive's Precision Chemistry™ solutions contain Allosperse[®] Delivery Technology, a patented nano-polymer that influences how proven active ingredients behave in the jug and the field to simplify crop production and deliver real results to growers.

ACTIVE INGREDIENT

NANO-POLYMER SHUTTLE

ALLOSPERSE[®] DELIVERY TECHNOLOGY

Allosperse targets and optimizes the interaction between active ingredients, liquid fertilizers, micronutrients, and other crop inputs creating a hassle-free, more efficient application to ensure performance is at its very best.

HERE'S WHAT CUSTOMERS ARE SAYING

“We use Midac and have had good success combating sugarbeet root maggot flies. With the Midac, being able to put that in-furrow, it saves us a lot of time, a lot of money, a lot of headache. It just works really well.”

Troy DeMars
Sugarbeet Grower, Pembina County, ND

SIGNIFICANTLY DECREASES IMPACT OF SUGARBEET ROOT MAGGOT

Midac[®] FC Treated

Untreated

An in-furrow application of Midac FC and starter fertilizer significantly decreases the impact of sugarbeet root maggot and other pests.

SEAMLESS COMPATIBILITY AND MIXING FOR IMPROVED EFFICIENCY

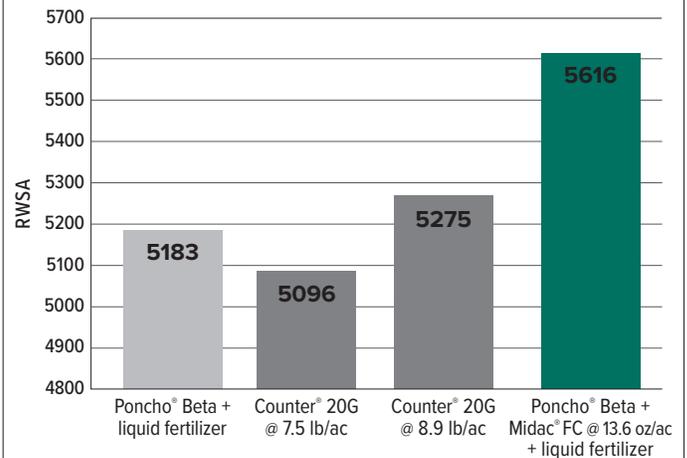

Midac[®] FC + 10-34-0

Competitor 4 lb imidacloprid + 10-34-0

The only fertilizer-compatible imidacloprid, Midac FC mixes seamlessly with liquid fertilizers, micronutrients and other crop inputs for an easy and efficient in-furrow planting operation.

INCREASES YIELD & ROI
